## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed June 17, 2005 have been fully considered but they are not persuasive. Applicant argues that because Wolf teaches a method that produces relatively large, "inadequately sintered agglomerates" and that these inadequately sintered agglomerates are present in sufficient quantity to require their separation from the powder, Wolf would therefore fail to teach a person of ordinary skill in the art to produce a powder wherein at least 40% by mass of the powder is comprised of tightly agglomerated composition. The examiner must disagree in that because Wolf prefers agglomerates to have particle size between 8 and 13 microns, col. 5, lines 17-20, Wolf teaches only large agglomerates which are inadequately sintered are separated from the powder. The remaining agglomerates having size between 8 and 13 microns in the powder would therefore present in major amount and thus reads on the claimed non-oxide powder.
2. The rejection of claims 28, 80-82, 88 to 91, 93 and 98 to 100 as being obvious in view of Wolf is maintained. The rejection was made in the previous office action and is incorporated herein by reference.

### ***Conclusion***

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

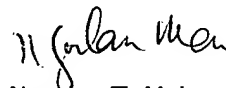

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
